

Announcing the annual
**GUANA ISLAND NATURAL
SCIENCE SYMPOSIUM**

at the

H. LAVITY STOUTT COMMUNITY COLLEGE

Every year in October, Guana Island hosts a scientific research programme. Scientists invited to Guana conduct their studies in the areas of natural history, ecology, conservation biology, systematics and biogeography. Their results are relevant to natural resource preservation and species conservation in the BVI.

On Friday, October 17th, from 5 – 7 pm at the College, several of these scientists will be presenting their research to the BVI.

"Raptors of the BVI"

by Clint Boal, Ph.D.

"The Mysteries of Distress Calling"

Kate LeVering, Ph.D.

"Invader Plants"

Joydeep Battacharjee

"Body Size and Habitat in BVI Lizards"

Adrian Andrei

"Opportunities for Study and Research at Texas Tech"

Gad Perry, Ph.D.

Please join us for an evening of presentations and discussion about natural history in the BVI.
